

Name: Jodi Montemayor

School: PUP

Section: DIT 3-1

Company: SBDC

Week No: 07

Inclusive Date: Aug 24–28, 2026

Monday

- Fixed the design and layout of the project search and added more project pictures.

Tuesday

- Continued fixing the project search and worked on the project modal and descriptions.

Wednesday

- Continued fixing the project layout, looked for missing pictures, and started working on the admin part.

Thursday

- Continued finalizing the project webpage and fixed some remaining issues, but some project pictures were still missing.

Friday

- Continued working on the back-end and added a function that allows the admin to directly add project pictures, descriptions, and other project information.

TASK ACCOMPLISHMENTS

- Improved the project search and layout.
- Added and organized project pictures.
- Improved the project modal and descriptions.
- Started working on the admin part.
- Continued developing the back-end for adding and managing projects.

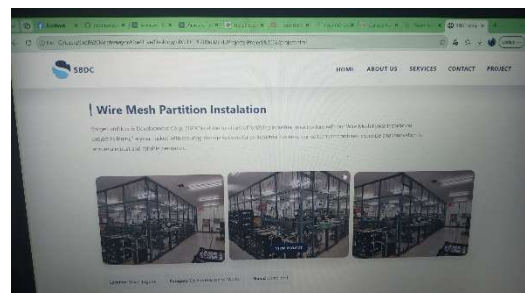

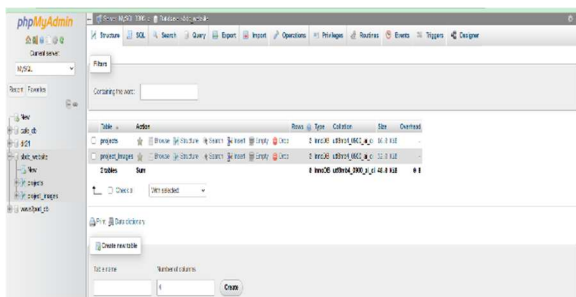

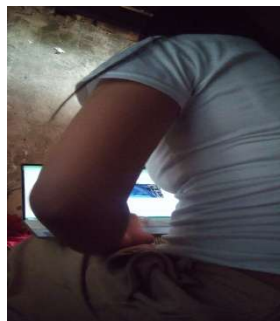

III. WEEKLY SUMMARY

This week, we focused on improving and finalizing the project webpage. Most of the tasks involved fixing the project layout, adding and organizing pictures, improving the project modal and descriptions, and starting the admin part of the website. We also continued working on the back-end functions to make adding and managing projects easier.

IV. LEARNINGS

This week, I learned more about developing the back-end part of a website and connecting it with the project webpage. I also learned how to create functions that allow the admin to directly add project pictures, descriptions, and other information. Working on these features helped me better understand how the front-end, back-end, and database work together.
