

Name: Jhan Craig L. Lojera
Program: DIT 2 - 1

Week No: 07
Date: August 29, 2026

Company / Organization: Sergon Building & Development Corporation

Objectives for the Week

- Further improvement in the system of SBDC server-side by refining the login system and fixing some minor system issues.

Summary of Daily Activities

Day:	Activities:
Monday	Refined the server-side login function and reviewed existing functions for necessary adjustments and fixes.
Tuesday	Continued improving the login functionality, fixed identified issues, and checked other server-side functions.
Wednesday	Made minor adjustments and fixed issues on the employee side, particularly with its features and functions.
Thursday	Continued improving and fixing the employee side while checking the functionality of its different features.
Friday	Further refined the employee side and tested the updated functions to ensure they were working properly.

Skills Learned

- login and authentication functionality.
- debugging and troubleshooting skills.
- Review and identify issues in existing functions.
- Testing and validating website functions.

Challenges Encountered

- Login functionality had issues that affected the proper authentication of users.
- Some existing functions needed adjustments or fixing.

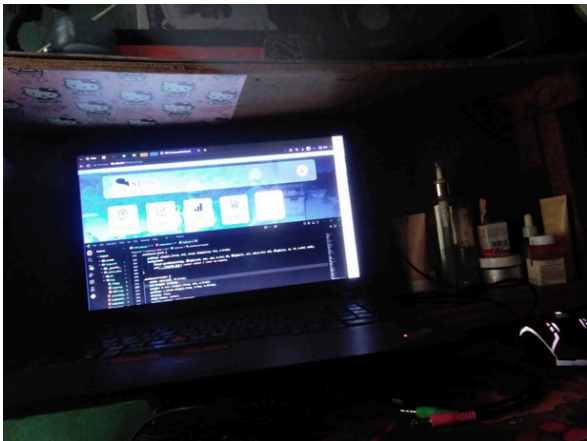

Solutions

- Reviewed and refined the login function, then tested it to ensure it worked correctly.
- Checked the functions individually, identified the issues, and made the necessary code adjustments.

Weekly Reflection

During this week, I learned the importance of carefully reviewing, testing, and improving system functions. Working on the login functionality and employee side helped me develop my debugging and problem-solving skills. I also learned that even small errors can affect the overall functionality of a system, so proper testing is necessary after making changes. Overall, the activities helped me gain more confidence in handling server-side and employee-side functions and taught me to be more patient and attentive when fixing issues.
